Breast Pumps 101

You should always call your insurance company to verify coverage under your plan. Deductibles and Co-pays do apply.

UPAH is able to bill your insurance company with a current prescription.

Medicaid plans do not cover the purchase of a breast pump. Please consult your case worker for more information.

Pump In Style – Starter Set

*No upgrade charge up front for most insurance companies.

Features

Medela's patented 2-Phase Expression® technology

Compact motor in a soft bag

Adjustable speed/vacuum control

One-touch let-down button

Benefits

Proven to get 18%* more milk when double pumping.

Fits perfectly into Medela's breastpump bags (**sold separately**) for a complete portable solution.

Helps you choose your most comfortable setting.

Lets you toggle between Stimulation and Expression phases for more efficient pumping sessions.

Pump In Style Advanced – Bag Sets

*This style has a **\$35** upgrade charge that is paid upfront at the time of purchase for most insurance companies.

****Wellmark BC/BS** pricing does not require this upgrade.

Features

2-Phase Expression technology with one-touch let-down button

Daily use - double-electric breastpump

On-the-go Tote & Backpack have a **built-in pump**

Two stylish microfiber bags to choose from (On-the-go-tote or Backpack)

Battery pack

Single knob speed/vacuum adjustments

Removable cooler bag with contoured ice pack

All parts that touch breastmilk are made without BPA

On-the-go Tote also features:

- Built-in bottle holders
- Tubing storage pocket

Benefits

Produces more milk in less time when pumping at Maximum Comfort Vacuum in the expression phase.

Designed for moms who pump several times a day.

For portable, discreet pumping.

Holds everything you need to pump.

Lets you pump anywhere, anytime. 8 AA batteries not included.

For comfortable pump settings.

Holds 4 breastmilk bottles and ice pack to keep breastmilk bottles cool.

Safe for you and your baby.

Help prevent spills and keeps tubing organized between pumping sessions.

For pumping and transport flexibility.

OR
