What motivated you to volunteer and why did you choose St. Luke's?

I wanted to volunteer to get more experience and new opportunities to meet people and improve my work skills.

What do you find most rewarding about your volunteer assignment?

I **love volunteering** for St. Luke's because I have a lot of chances to be independent and learn new things. I like how welcoming my supervisors are and how many people I get to meet!

How has volunteering changed your opinion of healthcare or St. Luke's Hospital?

I've realized how involved the life of healthcare workers is, and it's given me a **new perspective of appreciation** of healthcare workers of any kind.

What do you wish your team knew about you?

I wish people knew that I appreciate all of them, both my supervisors and the people I serve. They make my days **amazing** and I look forward to it every week.

What are your plans after graduation?

My plans after graduation are to go to college and get a job that involves taking care of others, whether that be in pediatrics or something else.
