

## Baby Caps

We are off to a great start with the introduction of new patterns for baby caps! Thank you to everyone that has knit or crocheted the January pattern.

When making these new hats please keep in mind that these are for babies. As a general rule, baby caps should have a circumference of 13-15 in and a height of 4-6 in. This may mean that your knitting needles or crochet hook need to be adjusted to meet the desired size. If you are unsure if your finished hat is the correct size click [here](#) for sizing guidelines or bring your finished hat by the Auxiliary office. Click [here](#) for February's knit pattern of the month.

## History Fun Fact

### *Remembering the snack bar....*

It was a huge affair when the snack bar was added to St. Luke's Hospital in the 1950s. Auxiliary members and other volunteers helped with it, although paid employees filled the grill and service roles. Located adjacent to and considered as an extension of the gift shop, the total facility was named "The 1026 Gift Shop." The snack bar was an excellent place to grab a hamburger or sandwich and bowl of soup. Volunteers ate there often, as did guests of the hospital and people from nearby Coe College. People who remember the snack bar will recall the paper napkins and paper-wrapped drinking straws. They are also quick to mention their favorite food choices, such as coconut cake, potato soup, chocolate chip cookies, and ham salad sandwiches. Throughout the years, the original entrance foyer to the hospital has undergone numerous changes, and the snack bar was closed in the middle 1980s with part of its former space utilized for the expansion of chaplain services.
