What motivated you to volunteer and why did you choose St. Luke's?

Last summer, I had an internship in the St. Luke's Emergency Room where I also was offered to volunteer! I **enjoyed the environment** there and really wanted to branch out to different parts of the hospital. The people in **Volunteer Services were so welcoming and friendly**, and I knew I wanted to spend my time here

What do you find most rewarding about your volunteer assignment?

How I am able to make people smile, or might make their days better. It really motivates me to do my best as a Wayfinder.

What do you like most about volunteering with us?

Most definitely the connections made at the hospital. I look forward to seeing Jodi, Renee, and Lori at the front desk every week. They tell amazing stories, advice, and are overall great company. I really **look up to them**.

How has volunteering changed your opinion of healthcare?

It really shows the background which we might not see as a visitor or a patient. It showed me that **everyone working is important**.

What are you "words to live by" or a quote that inspires you?

My dad always tells me to "have courage and be kind," which is from Cinderella. These words really guide my life.
