

Load Citrix on your MAC

#1) If you do not already have the FireFox Internet browser installed proceed to #2. If you do, skip to #5.

#2) From Safari, go to <http://www.mozilla.com> and load Firefox it is free.

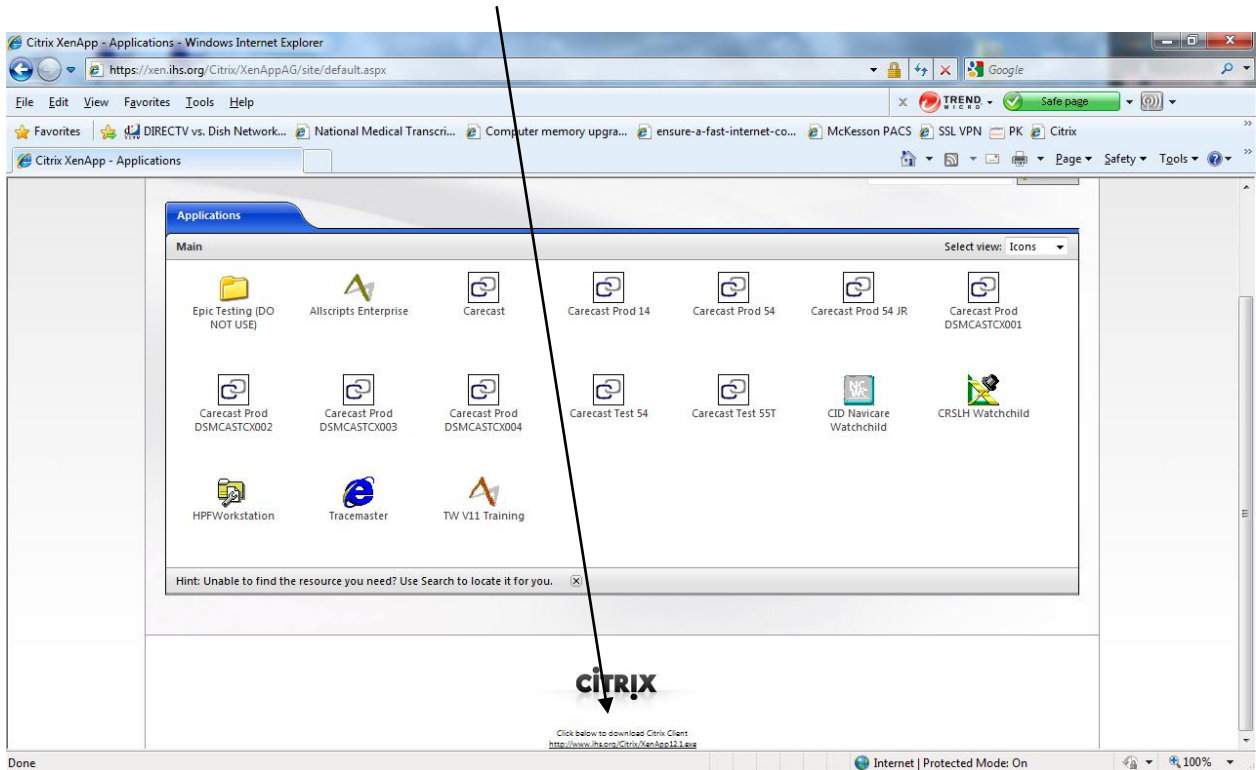

#3) After download, drag firefox icon to your dock.

#3) After you open Firefox go to <https://xen.ihc.org> .

#4) Once you log into Citrix, click on the link in the bottom, center of the screen that looks like this:

#5) Open this download with Stuffit Expander which should be your default. Accept the license, next, next, or OK. OK until it tells you that it is loaded and recommends you restart your browser. Close your Firefox browser and go back to site of interest <https://xen.ihs.org> .

#6) Once login screen appears again, log in using your username and password as directed by IT. From there you should be able to shoot off to your application of interest based on permissions.
