

Nurse Residency

Internal Resource Team Track

Overview

A 12 week orientation spent on 17 different Medical/Surgical/Telemetry/Rehab units at UPHDM:

- Oncology
- Orthopaedic
- Surgical
- Neuro-Trauma and more...

Orientation also includes Simulations, Shadows, and use of Mosby's Medical Surgical Modules and additional learning opportunities to enhance your knowledge of the unique complexities of med/surg patients.

Residents will then complete 4 week, independent, long term assignments. They will complete these assignments for up to a year and a half and will then be transitioned into the IRT team and will float to different areas on a day to day basis. Residents will have the opportunity to accept a position in one of the 17 units the IRT serves, if they determine that is their preference.

Opportunity to experience all three campuses!
