Policy on Resident Presentations at Regional and National Meetings

Purpose

This policy establishes the guidelines for surgery resident participation in presentations at regional and national meetings.

Procedure

The Department of Surgery Education encourages resident participation in presenting their original work at regional and national meetings. When a resident has a paper, abstract, or poster accepted for presentation at a meeting reviewed and approved by the Surgery Education Committee, the program will provide up to \$1000 to reimburse registration, travel, lodging, and meal expense. Reimbursement will be limited to the guidelines outlined by the attached policy from Medical Education Services.
