

Value Analysis

UnityPoint Health Value Analysis

UnityPoint Health maintains a structured process to review the appropriateness of acquisition of supplies, equipment, and purchased services. Our Value Analysis Team (VAT) is charged with evaluating potential new purchases with a value-oriented methodology. Under no circumstances will vendors introduce

any new products or services without VAT approval. In the event a vendor brings in a new product without VAT approval, UnityPoint Health nor the patient will be responsible for payment. Vendors will be referred to Supply Chain Management for disciplinary action per our Vendor Management Policy.

We welcome the opportunity to work with vendors to expedite the implementation of the most promising technology for our patients.
