Swing Beds

Swing bed is a Medicare term which refers to the practice of “swinging” patients from one level of care—acute care that requires hospitalization—to the next level—continued skilled nursing and rehabilitation services as patients continue their recovery. The patient must need skilled nursing or skilled rehabilitative services on a daily basis, and must be complex enough that services must be performed by or under the supervision of professional or technical personnel.

Adult Day Centers

ADULT DAY CARE: A facility which provides services for part of a day in a group setting to adults who need assistance with activities of daily living (ADLs), supervision and/or protection. Services may include personal care and supervision, provision of meals, medical care, medication administration, transportation, and activities designed to meet physical, social, and leisure time needs.

ADULT FAMILY HOMES: A place where 3 or 4 adults who are not related to the operator reside and receive care, treatment or services that are above the level of room and board and that may include up to 7 hours per week of nursing care per resident.

Wisconsin Department of Health Services website provides information on a county-by-county basis about these options and other possibilities for providing health or residential care.
