

Are YOU Prepared?

"It's always too early, until it's too late."

- On a scale of 1 (Let me die without medical intervention) to 5 (Don't give up on me no matter what, try any proven and unproven intervention possible), where do you fall on this continuum?
- If there were a choice, would you prefer to die at home, or in a hospital?
- Is there someone you trust whom you've appointed to advocate on our behalf when the time is near?
- Have you completed any of the following: written a living will, appointed a healthcare power of attorney or completed an advance directive?

Did you know? ONLY 30% of Americans have their healthcare wishes documented. If you are not one of them, the Muscatine County Advanced Care Planning Initiative will connect you with a trained, caring individual who will help you to talk about future healthcare goals and create your advance care plan. This is a **FREE** service for adults, age 18 and older. Services are available in **Spanish**. And house calls are available upon request.
